

University Hospitals

Fukuoka University Hospital

Following the establishment of the Faculty of Medicine in 1972, the Hospital was opened in August 1973. With the addition of the Fukuoka University Hospital New Building on 4 January 2011, the Hospital consists of seven buildings: the Main Building, the New Building, the West Annex, the Emergency Center, the Day Care Center, and the Training Center A- and B-Buildings. Together, they have a total floor space of 90,992.63 square meters. A total staff of about 1,774, comprised of 427 physicians, 88 clinical trainees, 851 nurses, 221 co-medical staff and 187 other staff in 23 medical departments, provide advanced medical treatment to an average of 1,121 outpatients per day, and 915 beds are available for in-patient care. Over 7,500 surgeries are performed at the Hospital every year. Since its foundation, the Hospital has continued to make every effort to improve its technologies, equipment and organization to provide better care and thereby contribute to the local community. Most outpatients have been transferred to the Organ Center in the New Building. In-patient facilities were established in the Perinatal and Mother/Child Medical Center, the Pediatric Medical Center, the Heart Center and the Digestive Tract Center, and the new building is directly connected to the Fukudai-mae station of the Nanakuma subway line. Adjacent to it is the Medical Hall, with seating for three hundred, while the Medical Fitness room is situated on the basement level, providing an integrated approach to health, nutrition, pharmaceutical creation and medicine.

The Hospital's medical departments are as follows: Oncology, Hematology and Infectious Disease, Endocrinology and Diabetes, Cardiology, Gastroenterology, Pulmonary Medicine, Nephrology and Rheumatology, Neurology and Health Management, Psychiatric, Pediatrics, Gastrointestinal Surgery, Thoracic/Mammary Gland and Endocrine/Pediatric Surgery, Orthopedics, Plastic Surgery, Neurosurgery, Cardiovascular Surgery, Dermatology, Urology, Obstetrics?Gynecology, Ophthalmology, Otolaryngology, Radiology, Anesthesiology, and Dental and Oral Surgery.

The New Building opened on 4 January 2011 contains the Organ Center incorporating almost all outpatient departments, as well as in-patient facilities for the Perinatal and Mother/Child Medical Center, the Pediatric Medical Center, the Heart Center and the Digestive Tract Center, and is directly connected to the Fukudai-mae station of the Nanakuma subway line. Adjacent to it is the Medical Hall, with seating for three hundred, while the Medical Fitness room is situated on the basement level, providing an integrated approach to health, nutrition, pharmaceutical creation and medicine.

Fukuoka University Chikushi Hospital

Chikushi Hospital was founded in 1985 in Chikushino City. Today, it has 14 medical departments serving an average of 380 outpatients per day and has 345 beds for in-patient care. With a total staff of about 570 people, the Hospital is composed of two buildings: the five-story main building and a seven-story annex for management and research. A new wing is currently under construction, scheduled for completion in January 2013.

In 2007, it was the first hospital established by an educational institution to receive certification from Fukuoka Prefecture as a hospital providing community support as the core medical facility for the region including Chikushino, Dazaifu, Kasuga, Onojo and Nakagawa Town.

The Hospital's medical departments are as follows: Cardiology, Endocrinology and Diabetes, Respiratory Disease, Gastroenterology, Pediatrics, Surgery, Orthopedics, Rheumatology, Neurosurgery, Urology, Ophthalmology, Otolaryngology, Radiology and Anesthesiology.
