

Bring advanced wireless to campus

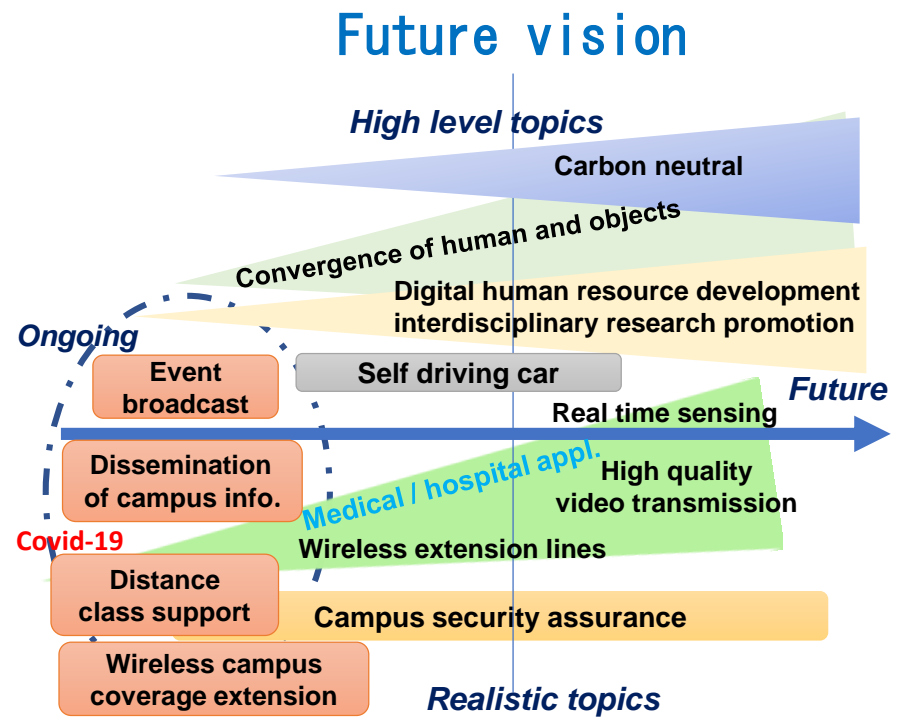

5G has great potential to contribute to CN in terms of transmission power saving per bit when compared with 3G or 4G+. We are planning to deploy local 5G to Fukuoka University. as a private 5G system.

Bring Local 5G to campus

Inspire Fukuoka University. students to touch the state-of-art ICT

- Possible R&D items;
- Development of sensor embedded 5G device.
 - High speed parallel stream transmissions.
 - IPv6 connection to a campus network.

Our primary objective is to provide a user friendly 5G environment for students and staffs as much as possible.

Explore new applications across departments as a foundation for a wireless campus.

†It is reported that Nokia confirms 5G as 90 percent more energy efficient (Nokia press release)
