## Fukuoka University Hospital

The Faculty of Medicine was established in 1972, and the Hospital opened in August 1973. The New Building, opened in January 2011, is directly connected to the Fukudai-mae station of the Nanakuma subway line, and access has been further improved with the completion of the nearby exit of the Fukuoka Urban Expressway.

The Hospital includes the Cerebral Embolism Center and other medical centers, with 23 departments offering team-based, multi-disciplinary medical treatment. The Emergency Center which so well symbolizes the Hospital provides emergency medicine around the clock, 365 days a year, to physicians at local medical institutions and emergency services. The New Building also holds the Medical Hall, with seating for 300, the Fukudai Plaza exhibition area, and a hospital garden open for strolls and relaxation, providing an integrated approach to health, nutrition, pharmaceutical creation and medicine.

The Hospital's medical departments are as follows: Oncology, Hematology and Infectious Disease, Endocrinology and Diabetes, Cardiology, Gastroenterology, Pulmonary Medicine, Nephrology and Rheumatology, Neurology and Health Management, Psychiatrics, Pediatrics, Gastrointestinal Surgery, Thoracic/Mammary Gland and Endocrine/Pediatric Surgery, Orthopedics, Plastic Surgery, Neurosurgery, Cardiovascular Surgery, Dermatology, Urology, Obstetrics-Gynecology, Ophthalmology, Otolaryngology, Radiology, Anesthesiology, and Dental and Oral Surgery.

## Fukuoka University Chikushi Hospital

The new hospital, an aseismic nine-story reinforced concrete structure with a total floor area of 26,016 square meters, was opened on 7 May 2013. It is licensed for 310 beds and 21 medical departments. It is equipped for intensive care, including Intensive Care Unit (ICU), Stroke Care Unit (SCU), and High Care Unit (HCU) facilities, providing even more advanced medical care. The new pediatrics wing provides improved service to the region as a core pediatrics hospital for emergency care. Hospital capabilities are further enhanced by the Inflammatory Bowel Disease Center, the Cerebral Embolism Center, Palliative Care Center, Outpatient Chemotherapy Treatment Room and the Rehabilitation Center.

The Hospital's medical departments are as follows: Internal Medicine, Cardiology,

Endocrinology and Diabetes, Respiratory Disease, Gastroenterology, Pediatrics, Surgery, Digestive Surgery, Respiratory Surgery, Orthopedics, Rheumatology, Neurosurgery, Dermatology, Urology, Ophthalmology, Otolaryngology, Radiology, Emergency Treatment, Anesthesiology, Rehabilitation and Clinical Pathology.

## Fukuoka University Hakata Station International Medical Clinic

The Clinic was opened on 21 April 2016 on the 8th floor of the KITTE Hakata Building, the new landmark in front of Hakata Station. A variety of medical services are offered through close cooperation between Fukuoka University Hospital and Fukuoka University Chikushi Hospital, including:

1. Women's medicine (provided by female physicians and technicians in a women-only area): Medical treatment, including breast surgery, obstetrics and gynecology, urology, proctology and psychiatry; cosmetic medicine, including wrinkles and sagging; breast cancer examinations; gynecological examinations, etc.
2. Rehabilitation and mobility therapy using HAL® robotic suits: Rehabilitation for patients recovering from cerebral embolism, spinal injury, nervous disorders and similar disabilities. When wearing the HAL® robotic suit, a patient can just think "Move" and the robot will move arms and legs appropriately in response.
3. Specialty outpatient care: In addition to general medical treatment, the Clinic also handles consultations and provides "second opinions" in circulatory, digestive and other

specialties in cooperation with the University hospitals. One new service is comprehensive foot and leg outpatient care. The Clinic also provides immunizations for people planning overseas travel.
