Demystifying the Chinese Economy (演題)

Justin Yifu Lin

Abstract

China was the largest and one of the most advanced economies in the world before the eighteenth century, yet declined precipitately thereafter and degenerated into one of the world's poorest economies by the late nineteenth century. Despite generations' efforts for national rejuvenation, China did not reverse its fate until it introduced market-oriented reforms in 1979. Since then it has been the most dynamic economy in the world and is likely to regain its position as the world's largest economy before 2030. Based on economic analysis and personal reflection on policy debates, Justin Yifu Lin provides insightful answers to why China was so advanced in pre-modern times, what caused it to become so poor for almost two centuries, how it grew into a market economy, where its potential is for continuing dynamic growth and what further reforms are needed to complete the transition to a well-functioning, advanced market economy.
